

## Keep an Eye on the House from Anywhere over the Internet!

Do you sometimes worry about things at home while you're at work or on vacation? Panasonic network cameras let you monitor your room over the Internet from wherever you are. They even let you pan, tilt and zoom the cameras by remote control. And you can choose the video format to match the Internet connection and your viewing needs. Let Panasonic network cameras keep an eye on things - anytime, anywhere - so you can relax and enjoy yourself.

## ENTRANCE

### Captures suspicious sounds Built-in Microphone

Sounds picked up by the built-in microphone can be heard through the PC. Video monitoring with sound enhances security by providing additional information that images cannot convey.

### Alerting Yourself when Changes Occur

The combination of a built-in human detection sensor that responds to heat and a motion detection function that responds to a preset camera threshold or sensitivity detects even slight motions. Captured images can also be stored temporarily in the camera\*<sup>1</sup> or sent to you by e-mail\*<sup>2</sup> or FTP data transfer\*<sup>3</sup>.

\*1 A maximum of approximately 250 images (320 x 240 pixels) can be stored in the camera.

\*2 PDP before SMTP authentication and SMTP authentication (PLAIN LOGIN and CRAM-MD5) are supported.

\*3 The sensor's detection history can also be e-mailed to you once a day at a preset time.

## VARIOUS PLACES

### Monitors large rooms entirely Remote Pan/Tilt and Zoom Control

The camera angle can be varied by remote control to monitor over wide areas. You can use the zoom function\* to take a closer look at certain places.

\* This is a digital zoom function and cannot be used from a cell phone.

Pan (display range: 149° max)  
Tilt (display range: 87° max)

#### 10x digital zoom

\*Area is multiplied by 10x.

## PET ACTIVITY

### Enjoy comfortable, versatile monitoring. Simultaneous MPEG-4 and JPEG

Cameras simultaneously send MPEG-4 images in three resolutions (VGA, QVGA, and SCIF), and JPEG images in the same three resolutions in favour motion, standard, and favour clarity image-quality types. MPEG-4 is recommended for viewing smooth motion images, and JPEG is recommended for recording higher quality images.

\*Size comparisons are simulated.

## Other Features

### Privacy Mode

When you return home, just press a button to cover the lens and protect your privacy. System administrators can also do this over the network.

### Full Screen Display

The monitoring image is easier to see because it fills the entire screen.

### Multi-camera capability

\*Up to 16 windows can be viewed at once
